### Transaction Codes (T-Codes) Used Regularly in the GCSS-Army Portal

<b>MiGO</b>	Use this transaction to manage turn-ins, including Found on Installation (FOI) and duplicate receipts.
<b>VL06i</b>	Use this transaction to view the items available for customer pickup. This is the Inbound Delivery Monitor.
<b>ZMB59</b>	Use this transaction to view your customer pick up list.
<b>ZPROSTAT</b>	Use this transaction to view the status of open and closed orders.
<b>VL02N</b>	Use this transaction to change an outbound delivery.

### T-Codes to use when conducting Stock Overview

<b>MMBE</b>	Use this transaction to view the overall stock situation of an individual material across a single or multiple organizational level.
<b>LS26</b>	Use this transaction to view a material stock situation by warehouse, by storage type and by bin.
<b>LS24</b>	Use this transaction to view a material stock situation at the warehouse bin level.

### Manage Bin Locations

- Create a storage bin from the AIT handheld or the main menu of the AIT desktop
- Print a Bin label from the AIT handheld or the main menu of the AIT desktop
- Perform a bin to bin transfer from the AIT handheld or the main menu of the AIT desktop
- Block/unblock a bin from the AIT handheld or the main menu of the AIT desktop
